3. The refinery consists of a power plant, cracking unit, combination unit, alkylation unit, gas recovery unit and associated facilities with approximately 80 storage tanks of varying sizes. There has been no major changes in the refinery area during the period between [REDACTED] There is however still sufficient room for expansion. Additional refining units could be constructed in close proximity to the now existing refinery. A little over a 1/4 mi east of the refinery an unidentified industrial area is now under construction. The canals for the water intake and outlet for this industrial area can be seen on the photography just south of the refinery. An elevated pipeline appears to extend from the gas recovery unit at the refinery to the industrial area U/C, indicating that some product of the refinery will be used in this area. 25X1D

The photo analyst assigned to this requirement was [REDACTED] 25X1A
[REDACTED] who may be contacted on extension 2934 should any question arise concerning this memorandum. This memorandum and attachments completes this requirement. 25X1A
